# HONEY SUPER SUPER FOODS HEALTH FROM MOTHER NATURE

O'RANDJO PROK

### HONEYDEW HONEY FROM OAK

This is natural honey, which is extracted from the honeydew on the centuries-old oak trees. It has a low pollen content, making it suitable for consumption by people with pollen allergies. Its composition is rich in minerals, trace elements and salts, thanks to the geographical area from which it is obtained, where the climate is influenced by three seas - the Black, the Sea of Marmara and the Aegean. It is the composition of the honeydew, which the bees process into honey, that makes it so perfect and unique.

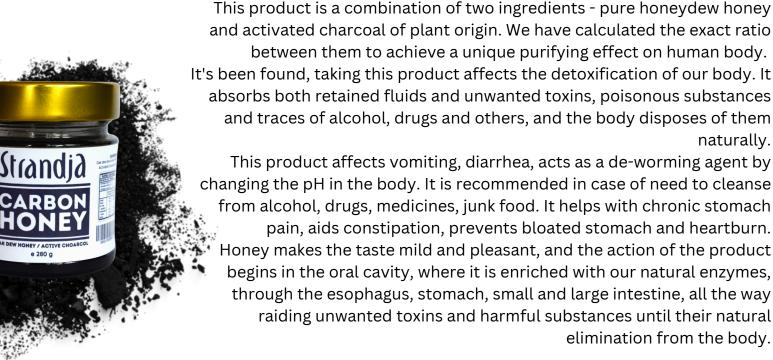

It favors electrolytic processes in the body thanks to its rich content of minerals, trace elements and salts, which are involved in the transport of both beneficial nutrients and the connections between our cells.

Its consumption in its pure form is extremely beneficial, but in addition, we incorporate it as a base for the production of super foods, in which it favors the maximum absorption of the other ingredients.

### **CARBON HONEY**

naturally.

### **GREEN HONEY**

The combination of honeydew honey with high-quality spirulina algae and Japanese matcha helps to saturate the body with beneficial chlorophyll. In this way, pure oxygen is synthesized, which enriches our blood and reaches every cell and organ in our body.

Honeydew honey enriches through the presence of minerals, trace elements and salts, creating bonds and electrolyte processes and assisting in the transfer of nutrients available in spirulina and Japanese matcha. The product promotes cleansing at the cellular level, enriching the blood with oxygen, thus having a healing effect on all our organs. It gives natural energy and cheerfulness, clear mind, well supplied blood organs.

The perfect taste and consistency of honey helps to make the consumption of spirulina not only useful and digestible, but also pleasant and tasty.

#### **CHILLI HONEY**

Their combination, mellows the otherwise super-hot taste from the peppers, and makes the product mildly spicy, making it suitable for consumption, even by people who cannot consume hot. Hot paprika is rich in Vitamins A and C as well as CAPSAICIN, important elements that give us good health. Consumption of CHILLI HONEY promotes health and blood circulation, to our heart and brain, as well as our limbs.

Extremely beneficial and an excellent start to the blood in the body. It is recommended for cold extremities, the needed healing of the heart and brain, for people working outdoors in winter.

Helps boost immunity for colds and flu.

A delicious addition to any meal or for direct consumption.

## **GOLDEN HONEY**

By adding high quality Ginger, Ceylon Cinnamon, Turmeric and Black Pepper, to this unique honey, we have prepared a well-known Eastern recipe from ancient times, which is known as "Golden Honey".

This product affects digestion, lowers blood sugar, leaves body fuller longer, helps burn calories, boosts immunity, helps with colds and flu, through the warming benefits of ginger.

Suitable for direct consumption with its exotic oriental taste, but just as good for sweetening tea instead of the standard honey. It is warming and refreshing, gives energy and acts to suppress appetite, by reducing blood sugar, when eating.

## DONKEY HONEY

Strandja

Our top product for boost immunity and lung regeneration. The combination of the unique oak honeydew honey and lyophilized donkey milk are two perfect ingredients for boosting immunity, due to the high immunoglobulin content of donkey milk.
